DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. Figures 9 and 10 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what is claimed by the phrase "continuously through the intersectional part determined by connecting the mounting part and the larger-diameter tube portion from the side member-side mounting edge" in lines 7-9.

Claim Objections

Art Unit: 3612

5. Claim 1 is objected to because of the following informalities: in line 1, delete the word "of". Appropriate correction is required.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Yoshida

Re claim 1, Yoshida discloses a shock absorber comprising a multi-diameter stepped tube (see figure 5) having different diameter integral tube portions formed by partially reducing or partially enlarging a straight tube that can be plastically deformed, and at least one stepped portion (5) formed between adjacent edges of each different diameter tube portions to join the tube portions integrally, in which a smaller-diameter tube portion as one end of the multi-diameter stepped tube connected to a bumper, and which a larger-diameter tube portion as other end of the multi-diameter stepped tube is connected to a side member, a mounting part (11), having a quadrilateral shape with a diagonal length of which is longer than a diameter of the larger-diameter tube portion, positioned at a front end of the side member, and a load transmission member (6) fixed between an outer side surface of the larger-diameter tube portion and the mounting part.

Art Unit: 3612

Re claim 2, the mounting part is a front end surface of the side member (1).

Re claim 3, the mounting part is a plate member provided at the front end of the side member (1).

Allowable Subject Matter

8. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claim 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stol et al., Simotsu et al., and Dohrmann disclose vehicle bumpers.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason S. Morrow whose telephone number is (703) 305-7803. The examiner can normally be reached on Monday-Friday, 8:00a.m.-4:30p.m..
